EDWARD STANFORD, COCKSPUR STREET, CHARING CROSS.

PRICE 3D.

Not a whole year

For reasons which it is needless to set out here fully the January record was not really reliable & has therefore not been entered though at the time taken (professedly)

The average on the other 11 months would work out at about 2·17 per month which added to the actual 11 months total would give 26·06 for the year. I am quite prepared to say however that the actual rainfall in January here did not greatly (if at all) exceed 1 inch.

It is hoped that the record for /97 will be reliable throughout.

Receiver of Rain Gauge:
Diameter 8 inches
Height above Ground 2 ft about
Above Sea Level 100 ?

Condensed Instructions.—Fix the gauge firmly, with its orifice level and 1 ft. above the ground, quite clear of trees and walls, empty it daily at 9 a.m., and enter it against the preceding day. When snow is not melted at the proper time for measuring, melt what is caught in the funnel by adding to the snow a previously ascertained quantity of warm water, and then deducting this quantity from the total measurement, enter the residue as rain. When there is no rain, a line should be drawn, rather than cyphers inserted.

Observers will oblige by sending either a copy of this Register, or even the monthly totals, to Mr. G. J. Symons, of 62, Camden Square, London, N.W. for insertion in his annual tables of *British Rainfall*, which now contain returns from more than 1500 stations.
Additional copies of this form (price 3d. each) can be obtained of the above, from Mr. Stanford. 6 & 7, *Charing Cross, and from all the leading opticians*

Notes. 1897

March 2nd Bright with clouds, cold air rain came on at about 4 to 5 p.m. wind backing and increasing to gale, heavy R. all night

March 3rd 9 a.m. Gale continued N.W. veering & increasing in force from 10 am till noon with snow -
8 large trees blown down in home village, many more tilted - at 10.15 a.m. an old building collapsed.

Nov. 25. Fog & mist all day, as on 24th but at 3.20 p.m. on 25th a thick yellow ~~thog~~ fog came over from E. it was as dark as it would have been naturally at 5 p.m. with it a drizzling rain the darkness lasted about ½ hour.

May 16. 1899

Dear Mr Symons.

Yours of the 10th re evaporation.
I think the error of Novr. 2nd is due to the daily rainfall having been registered as .49 when it probably was .59; you will see that with that alteration the total daily and monthly records approximate more nearly. If you adopt that correction it will make evaporation for NOV 2 = .03 and the total for the month = .47
I can find no good reason to alter any other figure either in Nov or Dec

1898.

Please let me know what figures you finally adopt so that I may make a note thereof.

Yours very truly
Wm. Matthews

The Rainfall in 1896 was abnormally distributed: a long drought in Spring and Summer which caused great loss in this dry country was succeeded by a wet autumn. September being the wettest month of the year instead of, as usual, one of the hottest and driest:

There was no Snow during these 12 months:

Mem. From Sept. to April 30. 8. months = 10.63
Sept. to Aug 31 12 —— 21.915.28
Aug 1. to Dec 31 5 months = 23.04

— Dense fogs on Dec 21-25 full of smoke settling in rime on the trees. When the rime fell on Christmas day with no wind the sediment of smoke was left quite black, and smelling strongly on the roads.
